- Presentation of the Ipad Lottery Student Survey winner

Light Lunch

The main goal of the InTerAct project (Industry Academia Interaction in the Marine Sector) is to establish interaction between the marine sector and universities to address the higher educational needs of the aquatic food value chain. The long term objective is to enhance the innovation capacity of the marine sector. InTerAct is funded by Nordic Innovation in collaboration with the AQFood Aquatic Food Production – Safety and Quality, an international double degree master program of five leading Nordic universities.
